THOTA TEJA

Software Engineer | Full-Stack Developer | Machine Learning Engineer

+91-7989522191 | tejathota.dev@gmail.com | Vijayawada, India | LinkedIn | Portfolio

PROFESSIONAL SUMMARY

Results-driven Computer Science Engineer (AI & ML specialization) graduating in 2026, with 12+ months of internship experience building full-stack web applications and machine learning models. Skilled in MERN stack development, REST API design, multi-role authentication, and cloud deployment on AWS and Oracle Cloud Infrastructure. Seeking a Software Engineer, Full-Stack Developer, or ML Engineer role where I can contribute to scalable product development, data-driven features, and cloud-native architecture.

SKILLS

Programming Languages: Python, JavaScript (ES6+), Java, Go (Learning)

Frontend Development: React.js, Next.js, HTML5, CSS3, Responsive UI Design

Backend Development: Node.js, Express.js, REST API Design, MERN Stack, JWT Authentication

Databases: MySQL, MongoDB, Redis (Learning), Vector Databases, RAG

AI & Machine Learning: XGBoost, Supervised Learning, Classification, Feature Engineering, Prompt Engineering, LLM Evaluation

Cloud & DevOps: AWS EC2, Oracle Cloud Infrastructure (OCI), Git, GitHub, Postman

Soft Skills: Problem Solving, Team Collaboration, Self-Directed Learning

WORK EXPERIENCE

Software Engineering Intern — *Jan 2025 – May 2025*

BEL Hyderabad — Bharat Electronics Limited (PSU) — Hyderabad, India

- Architected and delivered a full-stack Complaint Portal System using MERN stack and MySQL, reducing manual complaint processing time by ~60% across 3 departments — View Project Post
- Engineered an offline-first chatbot using Node.js with zero internet dependency, achieving 99%+ system availability for internal support teams of 50+ staff.
- Implemented secure multi-role authentication and authorization (User, Admin, Support) using JWT and role-based access control (RBAC), serving 3 distinct user tiers.
- Designed automated ticket categorization logic using rule-based classification, improving issue resolution efficiency by 40% and eliminating manual triage bottlenecks.
- Built real-time analytics dashboards with data visualization charts to track KPIs, SLA compliance, and system health metrics across departments.

Machine Learning Intern — *Jun 2024 – Aug 2024*

DBR Innovative Tech (AICTE Approved) — India

- Developed an XGBoost-based multi-class classification model for weed detection, achieving 92%+ accuracy on a real-world agricultural dataset of 10,000+ samples.
- Engineered end-to-end data pipelines covering data ingestion, cleaning, feature engineering, and transformation, reducing preprocessing time by 35%.
- Applied hyperparameter tuning (GridSearchCV, cross-validation) to optimize model performance, improving F1-score by 12% over baseline.
- Gained hands-on experience with supervised learning, model evaluation metrics (precision, recall, ROC-AUC), and reproducible ML workflows using Python and scikit-learn.

PROJECTS

Multi-Modal Steganographic Security Framework *2025 – 2026*

Final Year Project Vijayawada, India

- Built a secure communication system combining AES-256 encryption with LSB-based steganographic data hiding, supporting covert message transmission with imperceptibility scores >42dB PSNR — Live Demo
- Developed a full-stack real-time chat application using MERN stack with JWT authentication, and role-based access control for 2 user types.
- Designed adaptive data embedding algorithms achieving 30% improved undetectability against common steganalysis attacks compared to standard LSB methods.
- Deployed to production using Vercel; implemented environment-based configuration for staging and production environments.

Personal Portfolio & AI Prototyping Platform *2025*

Self-Initiated Project

- Designed and deployed a fully responsive portfolio website using React.js — Live Demo
- Integrated AI-assisted UI prototyping workflows using prompt engineering and generative tools, cutting UI development time by 50%.
- Provisioned and managed AWS EC2 instance for production hosting.

EDUCATION

B.Tech — Computer Science & Engineering (AI & ML) *2022 – 2026*

Dhanekula Institute of Engineering & Technology Vijayawada, India

CGPA: 7.51 / 10.0 | Coursework: Data Structures & Algorithms, DBMS, Machine Learning, Object-Oriented Programming, Computer Networks, Operating Systems

Intermediate (MPC) — Sri Chaitanya Junior College 2020 – 2022 | 80.2%

SSC — Sree Balajee Vidyalayam 2019 – 2020 | 100%

CERTIFICATIONS

OCI 2025 Generative AI Professional — Oracle (Race to Certification 2025) | View Certificate

Oracle AI Vector Search Certified Professional — Oracle (Race to Certification 2025) | View Certificate

OCI 2025 Data Science Professional — Oracle Cloud Infrastructure | View Certificate

OCI 2025 AI Foundations Associate — Oracle Cloud Infrastructure | View Certificate

AICTE Approved Machine Learning Internship — DBR Innovative Tech | View Certificate
